American School[®] has long offered the accredited high school courses you need at a cost you can afford, but now we are pleased to offer accredited middle school courses as well.

This booklet contains information about our print and online middle school courses which may be taken collectively as part of a 6th, 7th and 8th grade curriculum or on an individual basis to enrich an existing homeschool program or as an option for credit recovery.

No matter how many courses your child needs, your family will receive the following benefits after enrolling:

- Choose the format that best fits your child's learning style: paper-based, online or a combination
- Affordable cost with monthly payment plans available for full-year programs
- Caring student service, personalized grading of exams and 24-7 access to the Online Student Center where students and parents can access grades and helpful information
- Credibility in the form of accreditation by MSA-CESS, NCPSA and Ai and three-way tuition warranty

We hope you find the contents of this booklet useful and choose to enroll in our middle school courses. We believe they are the perfect complement to the high school courses that await your child when he or she is ready to begin ninth grade work.

It is our hope to count your child among those who not only complete our middle school courses but also to count them among the millions who have earned a high school diploma from American School.

HOW THE FULL-YEAR PROGRAM WORKS:

If you choose the grade level option for your child, students are required to complete one full credit (2 semesters) in English, math, social studies and science plus one elective credit per academic year.

On the following page, you will see a sample program outline for each grade level. Course selections may vary depending on each child's educational background. Our academic advisors will contact you to create a program that best fits your child's educational needs.

For instance, your child may have already successfully completed Pre-Algebra. You would then select Algebra 1 as the next course for you child.

We are continuing to grow our paper program. We encourage you to visit our site www.americanschool.org/middleschool for a list of current course offerings.

*"Every student can learn,
just not on the same day,
or in the same way."
- George Evans*
