

Study Hints

Here are some **study hints** which other students have said they found very helpful, and which we thought you might like to have too.

Each unit or lesson in the **textbook** contains several chapters of reading. For each unit in the book, there are study materials in the **Study Guide** too. The best way to prepare a lesson is to study just one **chapter** at a time.

1. Read the Study Guide introduction to the whole unit. Then read the Study Guide discussion for the first chapter or assignment.
2. Turn to your textbook and read all the material in the chapter carefully.
3. Return to your Study Guide and take any self-check tests or complete review questions for that chapter. Review any material you missed until you feel sure you understand it.
4. When you have completed the material and self-check tests for a whole unit, take the exam.

Best of luck in your studies. We hope you **enjoy** the course!
